NAGA PRAJWALITH P

prajwalithp@gmail.com | +91 83740 62657 | github.com/Nagaprajwalith

PROFILE

Enthusiastic and motivated professional with strong interpersonal and execution skills, eager to contribute and grow in a dynamic, learning-focused environment. Open to diverse challenges and committed to delivering meaningful impact through continuous upskilling.

PROFESSIONAL EXPERIENCE

Data Engineer, Vanna Infotech *Aug 2025 – Present*
Client: Pepsico (Alyptix)

- Design, build, and maintain end-to-end ETL pipelines using PySpark and Azure Data Factory, structuring data across Bronze, Silver, and Gold layers of a Medallion architecture to support enterprise-scale migration and transformation initiatives.
- Develop and optimize data workflows on Azure Databricks and Delta Lake — curating raw Bronze ingests into cleansed, conformed Silver tables and aggregated Gold tables that serve reporting and analytics consumers.
- Perform rigorous data validation and analysis across Teradata and cloud platforms to ensure data quality, integrity, and consistency for downstream reporting.
- Collaborate with cross-functional teams to translate business requirements into scalable data engineering solutions.
- Developed a Teradata data lineage tool to trace tables and views, improving visibility into data flow and reducing manual impact-analysis effort.
- Built a DDL conversion tool to automatically translate Teradata DDL scripts into Azure Databricks/Delta Lake schema definitions, accelerating schema migration.

INDUSTRY TRAINING PROGRAM

DSPM Training Program, Sonata Software *Mar 2025 – Jul 2025*
Tool: Cyera (DSPM Platform)

- Completed a hands-on Data Security Posture Management (DSPM) training program conducted by Sonata Software for selected students at Neil Gogte Institute of Technology, gaining practical exposure to Cyera, a leading DSPM platform.
- Used Cyera to discover, classify, and monitor sensitive data across simulated cloud environments, and practiced identifying overexposed data and excessive access permissions.
- Learned to analyze data risk findings and prioritize remediation actions in line with data protection and compliance best practices.
- Built foundational knowledge of data governance, access control, and cloud data security through structured coursework and hands-on exercises.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Databases & Platforms: MySQL, Teradata, Azure Databricks SQL, Delta Lake

Data Engineering: ETL Development, PySpark, Azure Data Factory, Azure Databricks, Medallion Architecture (Bronze/Silver/Gold), Data Modeling, Data Migration, Data Validation, Data Analysis

AI & Machine Learning: Supervised & Unsupervised ML, Artificial Intelligence, Generative AI, LLMs, RAG, Prompt Engineering

Data Security & Governance: DSPM (Data Security Posture Management), Data Classification & Scanning, Cyera

Version Control: Git, GitHub, Shell Scripting (Basics)

Data Visualization & Reporting: Power BI

Cloud Platforms: AWS, Microsoft Azure

Tools: GitHub Copilot, Claude Code, n8n, NotebookLM, Antigravity

EDUCATION

Bachelor of Technology, Neil Gogte Institute of Technology *12/2021 – 07/2025*
Computer Science & Engineering (Specialization in AI & ML) — CGPA: 8.0

Board of Intermediate, Narayana Junior College — 80% *2021*

Secondary School Certificate, Narayana High School — 9.2 CGPA *2019*

ACADEMIC PROJECTS

Dynamic Pricing for Financial Products — *AI/ML Engineer*
Technologies: LLM, HTML, CSS, JavaScript, Python, Flask

- Developed a dynamic interest-rate model for Fixed Deposits and Home Loans that personalizes rates based on customer profiles and market conditions, offering discounts to low-risk customers while managing risk and ensuring profitability — demonstrating the practical application of AI in financial decision-making.

Crop Intellect — ML Driven Crop Recommendation — *ML Engineer*
Technologies: Python, Flask, MySQL, HTML, CSS, JavaScript

- Built a machine learning platform that generates personalized crop recommendations by analyzing soil properties, climatic conditions, market demand, and other features — enabling data-driven crop selection to maximize agricultural yield and profitability.

Criminal Evidence Management System — Blockchain — *Blockchain Engineer*
Technologies: Blockchain Concepts, Smart Contracts, Decentralized Data Management

- Implemented a blockchain-based evidence management system ensuring tamper-proof, transparent, and traceable handling of forensic evidence through decentralized storage and smart contracts, restricting access to authorized roles and building trust in legal proceedings.

CERTIFICATIONS

- AI ChatGPT Workshop
- AWS Cloud Essentials
- Data Security Posture Management (Fundamentals)
- Skill Nation Power BI
